LABELLING and PACKAGING

Graphic Design Department

Our experienced graphics staff, equipped with the latest and the highest technology, is at your service to create the labels that you are dreaming of. Our graphic team also evaluates and do the necessary pre-printing processes for the designs.

You send us. Our team follow up all stages from the image in the mind till the printed labels.

Pre-printing Process

All processes are handled digitally. CTP (computer to plate) system is available which enable us To get a brighter and successful result on the labels as we are not using films .

With the help of Esko CDI Laser Exposure and Dupont Cyrel Fast, we are getting the printing plates ready as quick as 30- 40 minutes time.

Silk Screening

We are having the capability of silk screening both in offline and inline machines.

Special effects as, emboss varnishing, glittering varnishing are also applicable.

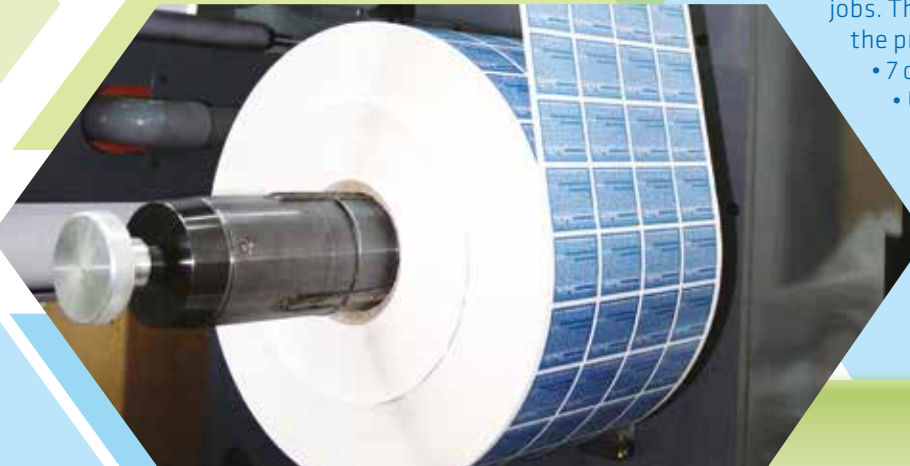

your SOLUTION PARTNER your SOLUTION PARTNER your SOLUTION PARTNER your SOLUTION PARTNER your SOLUTION PARTNER
